

Validation Risk Structuring and Compliance Evidence Compilation

From Security Validation to Compliance Dossier Creation

Scenario

You are a Validation Engineer in a software company.

Your team has already performed:

- **security scanning (Week 13)**
- **vulnerability detection**
- **validation reporting using OWASP ZAP**

Now your manager asks:

Organize all validation results into a structured risk register and compliance dossier for audit review.

Tools Required

- **MS Word / Google Docs / Excel**
- **GitHub account**
- **Week 13 ZAP report (report generated while scanning web application)**

TASKS

TASK 1 — Collect Security Validation Evidence

Instructions:

Use your Week 13 output:

- ZAP scan report
- vulnerability list
- screenshots

Output:

Create folder:

Week14_Evidence/

Include:

- scan report (PDF or screenshot)
- vulnerability summary

TASK 2 — Create Validation Risk Register

Instructions:

Convert vulnerabilities into structured risks.

Required Format:

Risk ID	Risk Description	Source Evidence	Probability	Impact	Risk Level	Mitigation
---------	------------------	-----------------	-------------	--------	------------	------------

Example:

VR-01	XSS vulnerability in search input	ZAP Report	High	High	Critical	Input sanitization
VR-02	Missing security headers	Scan result	Medium	Medium	Moderate	Add security headers

TASK 3 — Build Compliance Evidence Structure

Instructions:

Create structured folder system:

Compliance_Dossier/

|

|— Requirements/

|— SecurityReports/

|— RiskRegisters/

|— Screenshots/

|— ValidationLogs/

|— FinalReport/

Output:

Submit screenshot or folder structure proof.

TASK 4 — Create Final Compliance Dossier

Instructions:

Create a document:

Final_Compliance_Dossier.docx

Must include:

1. Project Overview
2. Summary of Security Validation (Week 13)
3. Risk Register Table
4. Evidence Summary
5. Mitigation Actions
6. Conclusion

TASK 5 — GitHub Repository Submission

Instructions:

Upload all files to GitHub

Repository Name:

Validation-Risk-Compliance-Week14

Required Structure:

/SecurityReports

/RiskRegisters

/ComplianceDossier

/EvidenceScreenshots

Submit:

- GitHub repo screenshot

IMPORTANT INSTRUCTIONS

- Use ONLY demo or lab systems (no real website testing)
- Evidence must match risk register
- Proper formatting is required
- Plagiarism = zero marks
- Screenshots must be included
